SUMMARY

Software Development Engineer with experience in backend, full-stack, Android security, fintech systems, REST APIs, microservices, and production-grade application development. Skilled in Java, Kotlin, Python, Spring Boot, Vue.js, PostgreSQL, JWT, Android SDK, testing, and CI/CD. Experienced in building secure authentication flows, scalable backend services, full-stack platforms, and user-facing features for fintech and enterprise environments.

EXPERIENCE

Directi (Zeta) **Aug 2025 - Present**
Software Development Engineer(Backend / Full Stack) *Bengaluru, Karnataka*

- Improved mobile security for PayZapp, a large-scale fintech application used by 20M+ users, by implementing real-time network state listeners, reusable Android utilities, and mobile-data-only authentication checks across signup & login flows.
- Built an end-to-end Loan Application Management system using Vue.js, Spring Boot, PostgreSQL, JWT, REST APIs, JUnit, Mockito, and Vitest, achieving 92% test coverage.
- Designed a microservices-based Microloan Distribution and Recovery platform with 20+ REST APIs covering onboarding, disbursement, repayment tracking, and delinquency handling.
- Integrated Help Icon UI across 15+ Android and Flutter screens using Figma specifications, ensuring consistent behavior across device configurations and combined builds.
- Improved referral attribution reliability by analyzing AppsFlyer OneLink templates, validating referral URLs, extracting referral codes, and preventing malformed URL persistence.
- Migrated static asset configuration from ImageBucket to Tachyon domains using Firebase Remote Config feature flags, enabling controlled rollout across environments.

Intel Corporation **Jul 2024 - May 2025**
Data Engineering and MLOps Intern *Bengaluru, Karnataka*

- Developed an enterprise-grade no-code MLOps deployment pipeline using GitHub Actions, Databricks CLI, MLflow, and Streamlit, improving ML release velocity by 30%.
- Built an automated data quality validation framework using Python, Snowflake Connector, and SSAS, validating 1M+ records and reducing manual validation effort by 70%.
- Implemented ETL ingestion pipelines from 5+ heterogeneous sources using Azure Data Factory, Azure DevOps, Snowflake, SQL, and REST APIs.
- Migrated critical ingestion workflows from basic authentication to OAuth 2.0, improving security & compliance readiness.

EDUCATION

Jaypee Institute of Information Technology, Noida **Aug 2020 - Jun 2025**
Integrated M.Tech - Computer Science and Engineering *Noida, Uttar Pradesh*

PROJECTS

Cold Outreach GenAI Tool **[Link]** | *LangChain, LLaMA 4, ChromaDB, Streamlit* **Jul 2025**

- Built a GenAI-based job outreach system that parses resumes, scrapes GitHub and portfolio content, stores contextual data in ChromaDB, and generates personalized cold emails using real-time job descriptions.

Audio To Text Punctuation Prediction **[Link]** | *Python, SparkNLP, PyTorch* **May 2024**

- Built an NLP pipeline combining Whisper ASR with a fine-tuned NVIDIA BERT model for punctuation restoration, achieving 95.4% accuracy on 200+ hours of educational content.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, JavaScript
Libraries/Frameworks: SpringBoot, Vue.js, PyTorch, Scikit-learn, SparkNLP, NLTK, NumPy, Pandas, Matplotlib, Seaborn, Flask, LangChain, PyMuPDF, LLaMA 4 (Fireworks), ChromaDB, Streamlit, MLflow, GitHub
Cloud/Data: Databricks, Azure Data Factory, Snowflake, SQL, MongoDB, Postgres
Tools: Git, Docker, Postman, VS Code, REST APIs, Vitest, CI/CD
Core Concepts: Data Structures & Algorithms, OOP, System Design, Computer Networks, Operating Systems

ACHIEVEMENTS

- **Intel Recognition:** Recognized for developing CI/CD pipeline that improved release velocity by 30% in ML workflows.
- **Kaggle Contributor: Car Price Prediction** Achieved rank 46 out of 5000+ participants. **Kaggle link**
- **LibreOffice: Open Source Contributor** Contributed 5 Gerrit changes with 20% performance improvement. **Link**
